

VERTICAL GARDEN
PRESERVED PLANT

01

WHAT IS A CONSERVED PRESERVED PLANT GARDEN?

The conserved plant gardens integrate living vegetation that through a treatment maintains its natural appearance without the need for maintenance.

It is a versatile system that allows all kinds of designs and possibilities, from the most traditional to projects that combine plants with other decorative elements. They are specially designed for interior spaces, standing out for their design and naturalness.

The preserved plant maintains the vivid and bright colours of fresh plants, and they do not need any type of maintenance. The key for them not to lose their colour over time is to place them in an interior space where they do not receive direct sunlight.

It is important to note that no guarantee can be given for a plant, as it is not possible to determine how long it will last, because it depends on the conditions to which it is exposed over time.

No need for
water or lighting

FEATURED PROJECTS

At SingularGreen we are passionate about what we do and we are known for creating creative solutions for your project, integrating Architecture and Nature.

The preserved plant is an innovative technique for decorating interiors with all the expressiveness of a natural vertical garden. Our technical team selects the preserved plants that best suit your project, to achieve surprising gardens and create green spaces that were previously unthinkable.

All the products we use are natural, preserving the fresh appearance and original beauty of the plants, so the colours and shapes may vary slightly from one production to another, each garden is a unique design.

Residential building Palma, 2016

HIDEAWAY HOTEL SANCTI PETRI, CHICLANA

Location: Interior of the restaurant Hideaway, Sancti Petri, Chiclana

Area of vegetation: 20 m²

Project description: The client contacted us because he wanted to fill a space located in the dining area where breakfast was served to customers. His proposal for the finish was that he wanted it to be very jungle-like so we installed a large number of hanging plants to create that effect.

Coca Cola, Madrid, 2015

BioBanús - Biocosmética (Marbella)

PIKOLINOS SHOP, ALICANTE

Location: Pikolinos shop, Alicante

Area of vegetation: 2 m² y 2 m²

Project description: In this case the client wanted something simple, he simply wanted to bring a touch of green to such a white space, so he opted for a small hanging plant. It was also a prerequisite that the logo should be inside the preserved garden.

RESIDENTIAL BUILDING, PALMA

Location: Interior residential housing

Area of vegetation: 13,09 m², 8,05 m² y 4,60 m²

Project description: In this case they wanted to create a green space next to a staircase. A certain volume was added to the design with some hanging plants but they did not want it to be excessive. The birds were implemented by the client.

Pikolinos shop, Alicante, 2014

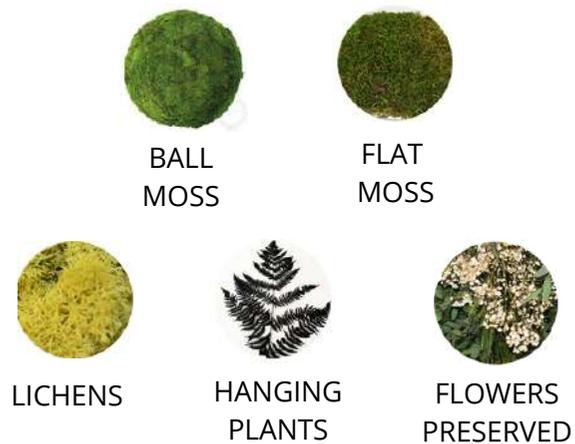

Gureak, Guipuzcoa, 2018

ONE SHOT HOTELS VALENCIA

Location: Coco e and Co./One Shot Hotels, Valencia

Area of vegetation: 3 m²

Project description: In this case we mounted the garden inside the metal structure. The distance between the wall and the structure had to be taken into account in order to place the hanging plants so that they would have their space and avoid breakage.

SPECIES SELECTION

GUREAK BUSINESS GROUP, PAÍS VASCO

Location: Gureak office interior, Guipuzcoa.

Area of vegetation: 6 m²

Project description: In this case the client set two essential requirements: the implementation of the vine trunks and the realisation of their logo. Based on these two central elements we built the rest of the design.

BUDGET ESTIMATED

In SingularGreen we have established 4 types of gardens to adjust the budget to the needs of our customers:

BASIC

- 0% Flat moss
- 5% Ball moss
- 5% Lichen
- 5% Hanging plant

OPTIONS:

- 1.Choice of 5% ball moss + 5% lichen.
- 2.You can choose 10% of either ball moss or lichen.

REGULAR

- 80% Flat moss
- 10% Ball moss
- 10% Lichen
- 20% hanging plant

OPTIONS:

- 1.You can choose 10% ball moss + 10% lichen.
- 2.You can choose 20% of either ball moss or lichen.

PREMIUM

- 70% Flat moss
- 15% Ball moss
- 15% Lichen
- 35% hanging plant

OPTIONS:

- 1.Choice of 15% ball moss +15% lichen.
- 2.You can choose 30% of either ball moss or lichen.

CUSTOM

You can include decorative elements, implement logos. You can propose any idea and based on that we will calculate the percentage of plants.

We can also vary certain percentages of the other options.

05

CONSERVATION CONDITIONS

Conserved plant gardens are a great green option for integrating nature into all types of interior spaces, as they do not require any type of maintenance.

However, they do have some basic conservation conditions, so that the plant does not lose its colour:

- They cannot be exposed to direct sunlight.
- They cannot get wet. They must have stable humidity and temperature parameters.
- The more brightly coloured plants, such as lichens, can stain the surfaces with which they are in contact.

06

WHO ARE WE?

En SingularGreen nos apasiona lo que hacemos y nos caracterizamos por crear soluciones creativas para tu proyecto, integrando Arquitectura y Naturaleza.

La planta conservada es una innovadora técnica para decorar interiores con toda la expresividad de un jardín vertical natural. Nuestro equipo técnico selecciona las plantas preservadas que mejor se adecuan a tu proyecto, para conseguir jardines que sorprenden y crear espacios verdes antes impensables.

Todos los productos que utilizamos son naturales, conservando el aspecto fresco y la belleza original de las plantas, por lo que los colores y las formas pueden variar ligeramente de una producción a otra, cada jardín es un diseño único.
