Green**

Vertical garden Vitoria Conference Centre, 2014

## INTEGRATING NATURE VS "GREENING"

### How to differentiate yourself by integrating Nature

Integrating nature into our Architectural projects has a greater meaning than "greening" a project. **Integrate it, is incorporate natural systems capable of creating ecosystems, enhancing your projects.**

Nature-based solutions seek to differentiate projects while taking advantage of all the benefits they bring.

### How can we help you?

At SingularGreen we have more than ten years of experience integrating nature in projects that have grown with a good development and are still in perfect condition.

We make **personalised designs** to help you integrate nature into your projects.

We provide **tailor-made solutions**.

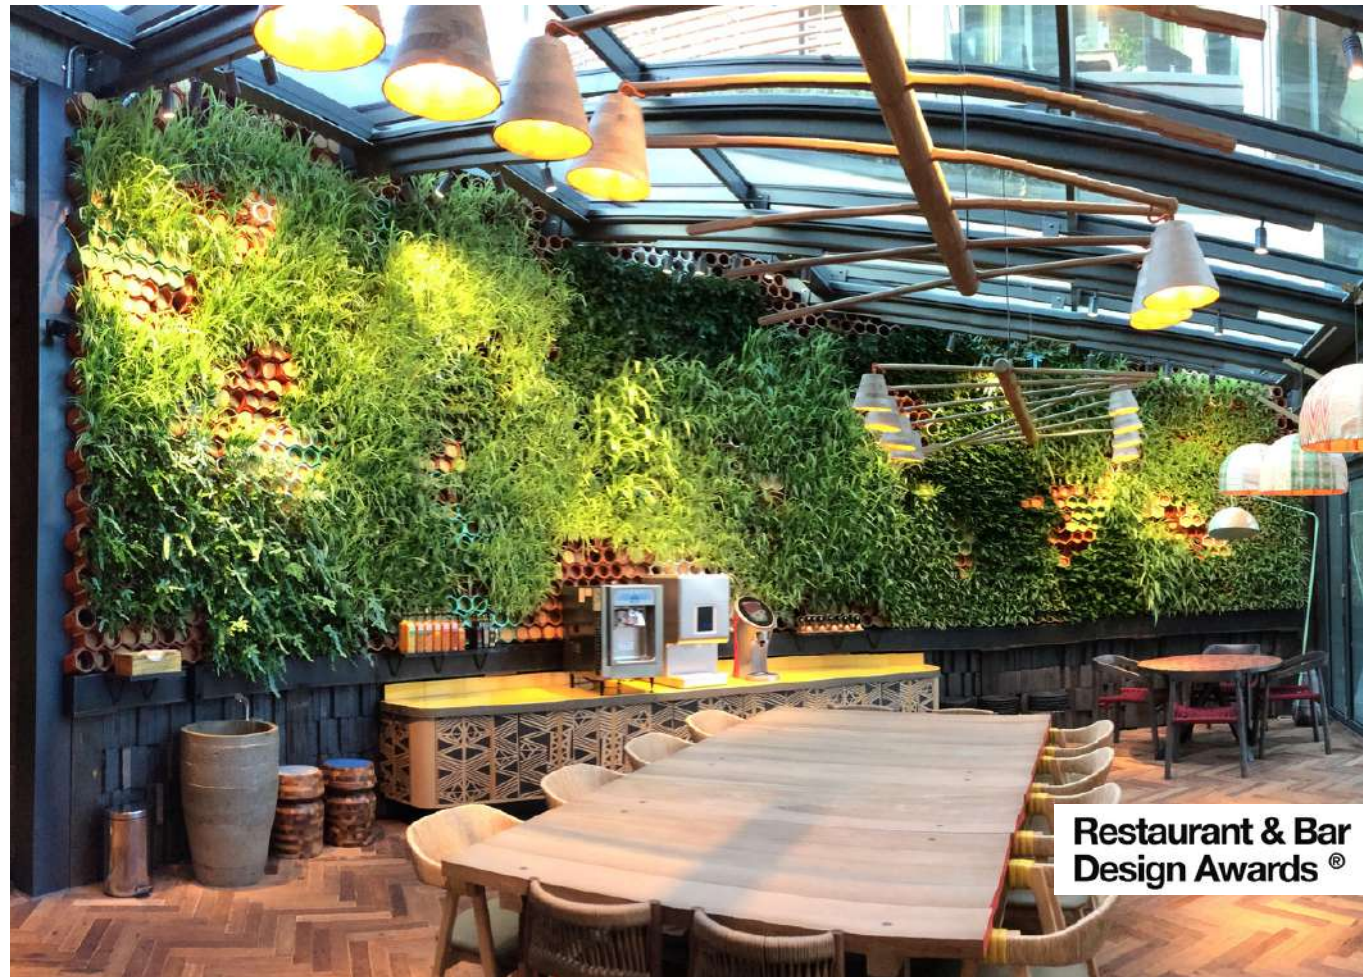

We have our **own developed systems**.

We offer **consulting** throughout the whole process.

## DESIGN AWARDS

Restaurant & Bar Design Awards 2015.  
Vertical garden Nando's Restaurant,  
London

Working with architects and interior designers to integrate nature into their projects.

Restaurant & Bar  
Design Awards®

## CUSTOMISED SOLUTION

### World's lightest green roof

---

Project developed for the municipality of Valladolid.

# INNOVATION DESIGN

## Green Shades, Valladolid 2020

Green Shades is the first system worldwide that allows the installation of vegetal canopies, tensile sails covered with vegetation, opening up a new range of possibilities for urban landscaping and the air conditioning of spaces covered by tensile structures.
